

AMNA AQEEL

Aspiring Software Engineer | Software Engineering Intern

Kahuta / Rawalpindi, Pakistan | 5121325001@student.iiui.edu.pk | 03355502853 | [linkedin.com/in/amna-aeel](https://www.linkedin.com/in/amna-aeel)

PROFILE

Motivated Software Engineering student at Ibadat International University Islamabad, holding a 4.0 CGPA and hands-on experience building applications in Java, C++, and modern web technologies. Passionate about object-oriented design, problem-solving, and turning ideas into functional, user-focused software. Certified in web development, software engineering fundamentals, cybersecurity, and generative AI prompt engineering, with a proven ability to learn fast and deliver results. Eager to bring strong technical foundations, curiosity, and dedication to a challenging internship role.

EDUCATION

Ibadat International University, Islamabad *Expected 2029*
Bachelor of Science in Software Engineering | CGPA: 4.0/4.0 (1st & 2nd semester)

CERTIFICATIONS

Introduction to HTML, CSS & JavaScript — IBM
Introduction to Software Engineering — IBM
Cyber Security Manager Certificate — Macquarie University
Generative AI: Prompt Engineering

PROJECTS

- GUI-Based Banking Application** *Java, Eclipse IDE*
Engineered a full-featured desktop banking application with an intuitive graphical interface for account creation, deposits, withdrawals, and transaction tracking, applying core Java and OOP principles to deliver clean, maintainable code.
- Student Record Management System** *C++, Visual Studio*
Built a robust console-based application to add, update, search, and manage student records, leveraging core data structures and C++ programming logic to ensure efficient, reliable data handling.
- E-Commerce Website** *HTML, CSS, JavaScript*
Designed and developed a responsive front-end e-commerce website featuring dynamic product listings and interactive UI elements, delivering a smooth, engaging shopping experience across devices.
- Automatic Day & Night Light Indicator** *Digital Logic Design (DLD)*
Designed and simulated an automatic digital logic circuit that intelligently detects ambient light levels to control indicator switching, applying core Digital Logic Design concepts to build a practical automation solution.

SKILLS

Programming: Java (strong grasp of OOP), C++ (programming fundamentals)
Web Development: HTML, CSS, JavaScript
Tools: Microsoft Office, Eclipse IDE, Visual Studio
Other: Problem-solving, analytical thinking
Languages: English, Urdu
